

SpexAI®

# Machine Learning and Computer Vision Engineer (f/m/x)

## Your mission

- Build and shape the brain behind our multispectral imaging sensor.
- By living data-centric AI, you will apply and modify proven ML models and learning strategies to our unique spectral data.
- Working closely with the Management team to identify gaps in the data and develop strategies to close them efficiently.

## Your skills

- | Solid understanding of Python and at least one Deep Learning Framework like PyTorch / TensorFlow
- | Already deployed Deep Learning models, for object detection and semantic segmentation
- | Experience in working with Git
- | A drive to learn and master new technologies and techniques
- | Good verbal and written communication skills in English
- | A plus are experiences with AWS / GCP, Weights and Biases, and in deploying models to edge devices, such as Jetson Xavier NX

## Your benefits

- Simplifying plant production – in Cannabis and beyond.
- Shaping and growing a young company – together.
- Working in an open, honest, and thriving environment.
- Remote and onsite work with trust-based and flexible working hours.
