

SpexAI®

Technical Project Lead - Controlled Environment Agriculture (CEA) f/m/x

The role: As the Technical Project Lead, you will spearhead our projects with clients and research partners worldwide. Your leadership will ensure our products and services not only meet but surpass industry expectations, obtaining crucial certifications and setting the gold standard for project management within the CEA industry.

Your mission:

- Lead critical projects with international stakeholders, ensuring seamless execution and delivery.
- Manage supplier relations to maintain high-quality standards and efficiency.
- Guide the certification processes, including CE and UL, for product compliance.
- Develop and optimize SOPs to uphold project integrity and excellence.
- Position SpexAI as the preferred partner in the CEA landscape through outstanding project leadership.

Your skills:

- | A seasoned leader with a background in technical project management within CEA or a related field.
- | Experienced with certification processes and standards on a global scale.
- | Exceptional organizational and multitasking skills.
- | Effective communicator, capable of steering international teams towards success.
- | Strategic thinker with an eye for detail and a commitment to excellence.

Your benefits:

Lead change in a sector that's vital for the future of sustainable agriculture.

Be part of an innovative team that values your expertise and vision.

Competitive remuneration and opportunities for international career growth.

Shaping and growing a young company – together.

Working in an open, honest, and thriving environment.

Remote work with trust-based and flexible working hours.
